Know immediately: Put real-time patient encounter data to work in your organization

MX Notify

MX Notify is a powerful tool that updates clinicians and other care providers moments after their patients are seen in the emergency department or are discharged from a hospital.

- Subscribe for all your patients or select at-risk populations.
- Delivered via secure messaging, directly into EHR and care management tools, or via secure web portal.
- See recent visit history to identify utilization patterns.
- Tools to manage follow-up.

Improve care coordination

You can contact patients as soon as they are discharged to coordinate follow-up care and appointments

Reduce costly readmissions

You can quickly identify patients who need extra help and support, reducing the risk of costly readmissions.

Earn incentives and qualify for Medicare payments

Millions of dollars of payments and incentives are available for providers and hospitals who perform well on reducing readmissions and providing follow-up care promptly after a hospital stay.

Schedule appointments

MX Notify includes contact information, discharge diagnosis and other key information so you can contact patients and get them in quickly for a post-discharge visit.

Get Started Today

See immediate value from MX Notify. Our team is ready to get you set up quickly.

Manifest
MEDEX

California's Largest Nonprofit Information Network

Manifest MedEx (MX) facilitates information sharing across 300+ healthcare organizations including almost 60 California hospitals and four of the state's largest health plans.
